Since the company was founded in 2003, more and more people are choosing Wellis products around the world. The increasing demand for a healthy lifestyle increases the demand for quality wellness products as well. Thanks to our dedication to continuous development and growth, Wellis has now become the largest hot tub manufacturer on the European market and already has a significant share in the American market.

We produce hot tubs, swim spas, their associated thermal covers, and spa side cover panels at a plant with a total area of 30,000 m<sup>2</sup>. The construction and continuous expansion of this huge plant, which is equipped with modern production tools, was motivated by the growing market demand, and our commitment to quality in manufacturing technology. Our products are stored in several warehouses. We currently sell 30.000 Wellis hot tubs per year at more than 1000 points of sale worldwide.

We have been developing our new product line for more than 3 years. Countless licences, thousands of work hours, and a multitude of our own innovations, that we are already extremely proud of, will be represented in our new models. Faithful to our company, we want to introduce excellent, user- and environmentally friendly products to the market, as it is increasingly important to us to pay special attention to the needs of our customers, and the same time protect the environment. The primary goal of our company is to provide exceptional wellness experience for our customers using as little energy as possible. There will be significant changes in the technological structure of our hot tubs while they will also get a renewed design.

"I was an active teenager; I travelled the world and was continuously on the hunt for new business opportunities. I worked on importing jeans from Asia and I always wanted to learn and expand. The real success in business found my brother and me in producing spas and together we created Wellis, Europe's leading hot tub company. In the beginning,

we imported spas and hydromassage tubs as ready-made, pre-assembled products. The year 2010 was to be a gigantic milestone in Wellis's and our lives, which is when we started manufacturing spas. We started building the factory in the spring of 2008, and a few months later the global financial crisis broke out, then the great economic recession started. Everyone tried to talk me out of starting to manufacture hydromassage hot tubs in the middle of the crisis, since they absolutely count as a luxury item. The company's management didn't endorse starting

manufacturing, either, but I decided to go for it. To put it delicately, neither starting to make the products, nor introducing our own hot tubs to the European market was easy. Fortunately, we could say the rest is history, since our efforts were crowned by such success that manufacturing products ended up pulling the company out of the crisis. As our next great leap, I would name breaking into America, the native land of hot tubs, where in the last 2-3 years we have been growing our roots and introduced the brand named Wellis. Parallel to expanding our business in the USA, we would like to grow on. It is a glorious thing to be on the cutting edge, but it's an even greater responsibility!"

Zsolt Czafik CEO and Akos Czafik CEO  
of Wellis Hungary.

Green energy  
– SUSTAINABLE  
PRODUCTION TECHNOLOGY

Instead of a long-term vision, focusing on sustainability has become the part of everyday life at Wellis. In the past few years, our company has placed increasing emphasis on the elements of our environmental-friendly and sustainable model.

Our efforts are based on two essential pillars: the first one is to optimize our production processes, and the second is to educate our customers about energy and water-saving aspects while considering the environmental factors.

Here are some processes which were introduced into the daily life of our company

- Reusing unnecessary materials with a special shredder.
- Production of abs (acrylonitrile-butadiene-styrene) from recycled plastic.
- Using low consumption pumps in hot tubs.
- Various developments in the name of renewable energy, such as integrating solar systems into our products.
- Reducing transport routes around the world and coordinating production and sales activities.
- Developing New, energy-efficient hot tubs

SAVE THE RAIN FOREST

In the process of our manufacturing technology, we pay special attention to environmental awareness, so we completely eliminated the use of wood during the production and replaced it with recycled materials.

This is how we protect our rainforests and nature. In order to achieve the most effective recycling, Wellis is not afraid of technological innovations either.

## Quality assurance

Our quality is continuously benchmarked against the highest German production Standards under the TÜV certification protocol that we subscribe to. This ensures we constantly meet and exceed all relevant International quality standards.

We are proud of this commitment to excellence and the clear differentiation from our market competitors that it affords us. Our TÜV certificate guarantees that our products are of excellent quality, and are regularly and independently monitored to meet and exceed the highest manufacturing standards. The CE label on all our products reassures our customers that the design and build meet or exceed all relevant EU standards.

3

years guarantee  
for the plumbing

10

years guarantee  
for the shell

## The result of 3 years of development

The Wellis R&D team has been working for 3 years on the new product portfolio, which will be revolutionary throughout the world.

61 patents are already registered in Europe; 14 in the US. Also there is a world patent for the electric water diverter. Technology breakthroughs result in energy-efficient and environment-friendly solutions.

# Environmental awareness and energy efficiency

# New water diverter: Wow system

New Life Line Video

Energy-efficient solutions while also preferencing sustainability and environmentally conscious production technologies.

With this in mind, it was obvious that our new and renewed products would also be produced in accordance with these standards.

This is the reason our revised logo was named Life, which name will be carried on by both our product families: Peak and CityLife.

ENERGY EFFICIENCY

WATER TREATMENT

DESIGN, APPEARANCE

Our improved electric water diverter replaces the large manual diverter. Our device fills the same function and comes with a smaller panel with buttons for easy use.

The electric water diverter makes for a gentler massage experience due to the fact that after activating it, the speed of the water increases gradually. Thanks to the automation, we've built a new massage experience into the tub: the gradual changing of the direction of the massage every five seconds creates a pulsing effect, providing an even more authentic feeling of a traditional massage.

Concerning the water current, we combined the massage strength of two older-model massage pumps in only one by straightening the pipes and installing the

new water diverter. This way, the consumption of energy while in use has been reduced to half the previous amount.

Wellis made an energy efficient water diverter, which patent is registered in 152 countries.

Compared to our competitor's solution, it has 23% higher pressure with approx. 30% less energy consumption. Moreover, we compared it to our previous models, and the results were 75% higher pressure with approx. 41% less energy consumption.

**Wellis EVEREST with old water diverter**  
To reach 12 PSI massage feeling needed:

2×3HP + 2×2HP pumps and 7400 W

**Wellis EVEREST life with new diverter**  
To reach 12 PSI massage feeling needed:

2×3HP pumps and 4400 W

# Smartphone application

Control your spa from home or while you are on the road with the Wellis Smartphone™ app!

Available for both iPhone and Android smartphones. Set the desired temperature and other functions from your phone, before you head over to the holiday house, so that by the time you arrive you will have a heated, ready-to-use spa waiting for you, providing you with all the benefits and positive effects of a Wellis hydromassage.

# New Life scandinavian insulation

Most of our spas have received a new type of Life Scandinavian insulation. These insulation boards have been inserted into the spa's support frame, rather than being attached to the exterior cladding. The insulation is dimensionally accurate for the frame's inner measurements and can be easily installed or uninstalled.

The foam insulation under the rim has also been exchanged for an aesthetically more pleasing Life insulation.

In the tray, instead of the previous POLYFOAM insulation, we implemented the best insulator we could find: Air. We achieved this by installing an ABS sheet near the bottom plate, creating insulating air pockets.

## SMART-In Step system

The heat pump can be stowed under the larger step. The heating of the water can be maintained more cost efficiently, without affecting the product's aesthetics.

The Smart-In Step system, equipped with a built-in heat pump, is capable of heating or cooling the water between -5°C and +40°C, allowing for savings of 70-75% of the spa's heating energy. Inside the stairs, we have designed storage compartments where bathers can store towels or water treatment products. Additionally, our Peaklife models are equipped with a USB socket for mobile phone charging.

# Water Purity

All Wellis spas use a multi-stage filtration and sanitation system that ensures crystal clear, safe bathing water with the minimum of user input.

The process starts with our special antimicrobial cartridge filters. The low energy eco-circulation pump draws spa water through these filters where any tiny particles are trapped. The antimicrobial coating then helps to destroy any bacteria that may be attached to the filtered particles, preventing growth and smells and ensuring the filters are easily cleaned and returned to service many times over.

Once the spa water has been filtered it passes through the heater and then the eco-circulation pump. Next it is passed through sanitation device that we fit.

Although a spas bathing water can be kept safe by chemicals alone, an electronic sanitation device will greatly reduce the amount of these chemicals that are required, and hence improve the quality of the water for bathers. Every spa we make is fitted with this device: WellisGuard.

Our filters ensure the purification of the water several times a day, leaving no dirt on the floor.

Our antimicrobial spa filter cartridges are designed to provide an unsurpassed level of leisure water cleansing.

## CRYSTAL CLEAN SYSTEM

Thanks to the pipe with a diameter of 48 millimeters, the motor circulates more water and does so faster, thus filtering the water more speedily. The new circulation jet has been designed to have 3 zones, where 2 zones are pointed downwards to stir up the sand and dirt from the bottom of the hot tub.

The zone in the upper area then directs the water into the filter.

WELLISGUARD

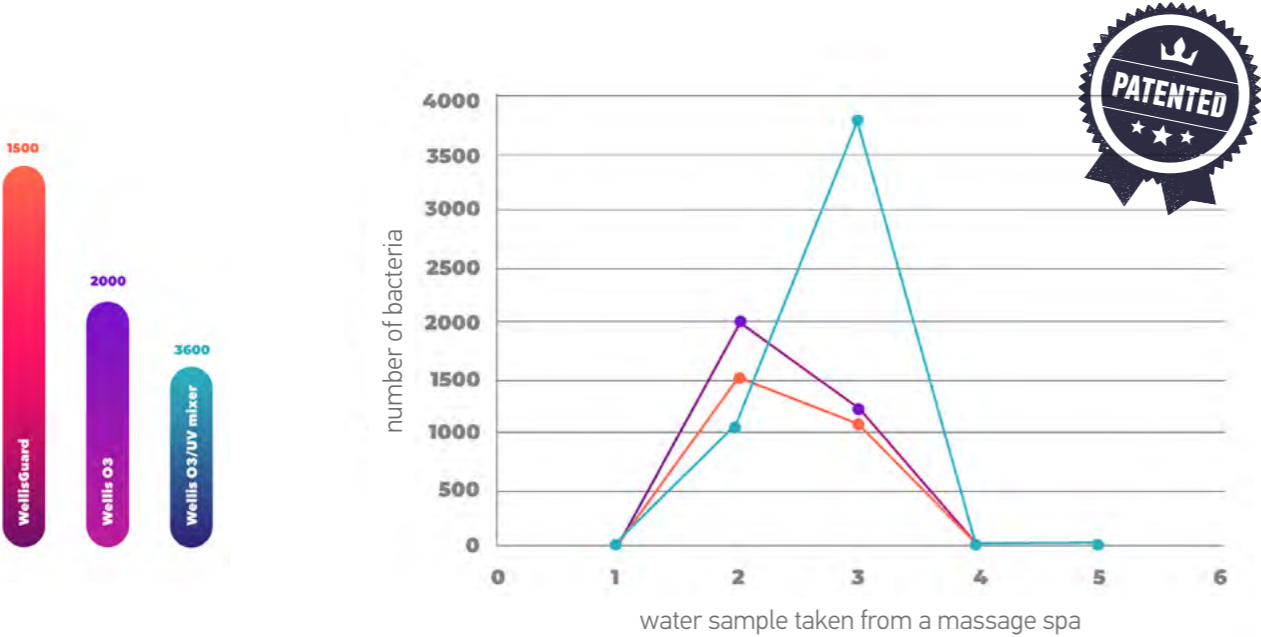

Provides 20% fresher water when used with the appropriate amount of chlorine, compared to traditional systems. Ensures perfect water clarity.

The tests conducted during Wellis' development work have shown that the systems we use have proven to be the most effective solution.

To enhance water clarity and freshness, we developed the WellisGuard, which has proven to be the most effective when used with chlorine and

the appropriate amount of pH regulator. Thanks to our system, less chlorine is needed compared to traditional systems, making the hot tub water more pleasant and crystal clear.

Our goal is to achieve the best possible cleaning method and reduce the amount of chemicals currently used. The WellisGuard is currently under patent.

Sound system

IN-LINE WIS

- This useful, built-in accessory provides 24-hour monitoring of your spa's water quality status via your smartphone.
- The machinery also provides the exact and required amount of chemicals.
- Since this is a built-in system, it does not disturb us during rest, it is a completely new system, developed by Wellis
- You can download the WIS application from Google Play or App Store.

CityLife Rim

MYMUSIC™ 2.0 (WITH 2 SPEAKERS) (CITYLIFE)

Immerse yourself in the myMusic™ 2.0 sound system, crafted with the latest waterproof technology to deliver superior sound quality. With no need for external devices, connect effortlessly to the built-in Bluetooth receiver from your mobile phone. This system simplifies your audio experience while maintaining high fidelity sound, making it perfect for any modern lifestyle.

# Future of design

## LIGHTSIDE™ SPA CABINET

Wood-like, wide horizontal side and corner bars. These elements add an intimate atmosphere to the appearance of the spas. The cabinets are available in grey and brown colour. Besides this, our new spa side cabinet's futuristic look instantly flies us into the future. An LED strip runs along the side of the spa cover (PeakLife). The newly developed corner elements give a more modern and futuristic look to our new range of hot tubs.

Lightened, soft pillow

## NECK MASSAGE & HEADREST

Takes your daily stress off your shoulder and neck. Advanced ergonomics, more comfortable design. The design of the headrest follows the line of the neck and head so you can relax more comfortably in our hot tubs.

## WATERFALL

Sit under the cascading water and enjoy a soothing neck and shoulder massage. This accessory is a new development of Wellis, there is no other product on the market that is similar to it.

PeakLife filter housing

## FILTER HOUSING

Our custom-made filter housing has an outstanding design, which complements the shades of the spa acrylic. Filters can be replaced easily with one move, anyone can do it easily. We made a unique, lighting design, which makes the hot tub more modern.

## ∞ WE DESIGNED THE 7" ROTATING INFINITY JET

The infinity jet makes the massage experience even more enjoyable by massaging a larger portion of the body and doesn't only move up and down, it draws an infinite figure eight as it turns.

Infinity Jet

Waterfall

# Exclusive Lights colour therapy

In our spas we call this mood lighting. Our chromotherapy system is based on lights of three different colours: green, blue and red. These can be set to fade gently through the spectrum or, by a simple touch of the spa's control panel can be fixed on the single colour most beneficial to your mood.

## EXCLUSIVE LIGHTS COLOUR THERAPY MOOD LIGHTING

When connected to Wellis control panels, including the SmartTouch systems, the Exclusive Lights system can be easily controlled. While the SmartTouch interface allows for personalized settings with an infinite range of colors and dimming intensity, other control panels offer the capability to step through colors, though with a more limited selection. The Exclusive Lights system can enhance the spa experience by illuminating three lighting zones: central lighting, rim lighting, and cabinet and corner lighting.

## RIM LIGHTING

Rim lighting is a design element located under the decorative elements, the cup holders, the taps, and the filter housing. The jet lighting can be controlled simultaneously.

## LIGHTING JETS

Wellis has developed numerous patents for its new models, one of which includes the innovative Lighting Jets. This special feature is available exclusively in the Premium Edition and Premium Plus Edition packages. The jets illuminate not only themselves but also the surface around them, enhancing the spa's interior with a modern and futuristic appearance, akin to sitting in a spaceship. This unique design not only modernizes the look of the spa but also increases the lighting surface, making it unlike anything else on the hot tub market.

## LIGHTSIDE™ CABINET SYSTEM (PEAKLIFE)

The LightSide™ cabinet system appears in Wellis' new spas, which includes hidden lighting under the corner elements, and an in-house developed LED strip, which runs along the side cabinet of the hot tub. The integrated LED strip provides a special ambiance for evening bathing.

## CENTRAL LIGHTING

All of the hot tubs have a central, underwater lighting, which lights the water of the entire spa.

# Massage of Wellis

## RELAX MASSAGE SEAT

It targets the regeneration of the shoulder girdle and the longitudinal trunk muscle tissues, as well as the hip flexor muscles and the knee extensor muscles – the muscle groups most exposed to everyday loads.

## EXPERT MASSAGE SEAT

Its adjustable jets can have physiological effects with customized directions and strength.

## COOL DOWN MASSAGE SEAT

The armchair design provides relaxation after training; its psychological and calming effect should be mentioned in addition to the recovery of physiological functions.

## FOCUS MASSAGE SEAT

It offers its user an experience similar to the Expert effect, relaxing the longitudinal trunk muscle tissues, and passively exercising the hip and the thigh flexor and extensor muscle groups.

## BODY FLOW MASSAGE SEAT

The massage seat with the most intensive physiological effect; in addition to the trunk's muscle fibers, it also has effects on venous and lymphatic circulation in the lower limbs, in this way bringing relief to vein valves.

## INTENSO MASSAGE SEAT

The most refreshing massage seat. The favorite of professional athletes. After exhaustive and intensive training, it ensures the regeneration of the most critical areas, the back and leg muscles Relax.

\* The layout of the jets may vary for each tub in the different seat designs.

# Colours of Wellis

## ACRYLIC COLOURS

We have a comprehensive range of 4 beautiful contemporary shades of acrylic for our spas that will harmonise with any setting – indoor or out: Ice white, Midnight canyon, Sterling silver and Storm grey.

Ice white

Sterling silver

Storm grey

brown

grey

## CABINET COLOURS

No more sanding, oiling, and messy maintenance of a traditional timber cabinet. Our spa cabinets are made of a UV-resistant polymer material that looks as good as real wood but is entirely maintenance-free.

PeakLife spas have the new LightSide™-design cabinet is paired with vertical corner elements, giving elegance to the models. Available in grey and brown colors.

CityLife – Jupe Horizont Side™

PeakLife – Jupe LightSide™

# Control panels

## SMARTTOUCH CONTROL PANEL (PEAKLIFE)

Full-featured keypad with color capacitive touchscreen display. Parting ways with physical buttons, keys, and overlays, our touchscreen keypad is fun to use, simple to learn and features an intuitive and engaging one-level menu interface.

## EASY7 CONTROL PANEL (CITYLIFE)

The Wellis Easy7 brings all the features you really need to one keypad. Compact, with a big LCD screen; bright enough to be seen throughout the day; simple enough to use in the middle of the night; affordable, yet solidly built.

## EASY4 CONTROL PANEL (CALLISTO P&P, CASTOR P&P)

A high quality control system, designed to perfectly control the bathing experience. The Wellis Easy4 brings all the features you really need to one keypad. Compact, with a big LCD screen; bright enough to be seen throughout the day; simple enough to use in the middle of the night; affordable, yet solidly built.

# Wellis® Cold Plunge

## EXPERIENCE THE POWER OF COLD WATER THERAPY

Revitalize your health with the refreshing benefits of cold water therapy. Boost your energy, enhance focus, and speed up recovery while reducing stress and inflammation. Regular cold water immersion strengthens your body and sharpens your mind, helping you feel recharged and ready for any challenge. Ready to take your wellness routine to the next level? Dive into the transformative effects of cold water therapy today!

## INCREASES ENERGY AND ALERTNESS

Cold water can significantly boost your energy levels and enhance alertness. The sudden drop in temperature stimulates your body, increasing your metabolism and triggering the release of endorphins, which are natural mood enhancers. This leaves you feeling energized, awake, and better able to focus throughout the day.

## REDUCES STRESS AND ANXIETY

Immersing yourself in cold water can help reduce stress and anxiety levels. The initial shock of cold water causes the body to release adrenaline and cortisol, the primary stress hormones. However, over time, regular cold water therapy can help lower the production of these hormones, resulting in a calmer and more relaxed state of mind.

## IMPROVES IMMUNE SYSTEM FUNCTION

Regular cold water immersion has been shown to strengthen the immune system. The body's response to cold water includes an increase in the production of white blood cells and other immune cells that help fight off infections. This boost in immune cell production can lead to improved overall immunity and a reduced risk of illness.

## REDUCES SWELLING AND PAIN

Cold water immersion helps reduce swelling and pain in muscles and joints by constricting blood vessels and decreasing blood flow to the affected areas. This process helps alleviate inflammation, making it a great option for those dealing with arthritis, muscle soreness, or joint pain.

## TRANSFORMS YOUR LIFESTYLE

Incorporating regular cold water therapy into your routine can lead to significant improvements in your overall health and well-being. From physical benefits like reduced pain and inflammation to mental benefits like enhanced mood and reduced stress, cold water immersion can make your life healthier and more enjoyable. Give it a try today and experience the transformative effects for yourself!

## COOL&HEAT PUMP

COOL/HEAT Pump (2-40 °C) 3kW – 20CR3-SB The Iceland cool&heat pump is capable of cooling the water down to 2°C. Its operating temperature ranges between -5 °C to 43 °C. It can cool 100 liters of 23 °C water down to 5 °C in as little as one and a half hours, at an outside temperature of 15 °C. If desired, bath water can be heated up, up to 40 °C for a pleasant evening soak. With a heating COP value of 4.05, it can deliver 2.1 kW of energy from 500W of absorbed energy. Settings can be easily adjusted using the control unit that is equipped with a digital display or through the application installed on your phone, even from remote locations.

Experience the benefit of a Cold Water Immersion (CWI) with the Wellis Iceland Cold Plunge Tub. With this tub, you can chill your water to as low of 2°C or heat it to as warm as 40°C.

With LED lights inside the tub and on the outside panel, you can enjoy ambiance while recoving in one stylish unit.

The installation of this Plug and Play tub is ever so easy. Simply drop it in place, fill with water, set the temperature and enjoy the benefits of CWI with Wellis Iceland.

**SpaGrip spa mounted**  
This powder-coated, rust-free handrail, partially covered with anti-slip foam, can be mounted on the side panel of any spa. It ensures a comfortable and safe way to get in and out of the spa.

**SpaGrip floor standing**  
The floor-standing version of SpaGrip can be clamped under the spa and attached to the side cover. It guarantees a convenient and secure way of entering and exiting the spa, while can be replaced when not needed.

**TowelBar**  
Crafted from sleek, black powder-coated aluminum, TowelBar holds your towels just a short distance away from splashing water. When not in use, it conveniently folds flat against your spa. With quick and easy installation, it is compatible with almost any spa model.

**Spaziano tray**  
With its sturdy construction and 360° rotation, Spaziano tray offers a versatile and hassle-free way to store snacks, drinks, reading materials, and other essentials while enjoying your spa experience.

**WelliStep**  
The hassle-free spa step that requires no maintenance, featuring a UV resistant plastic construction, a weight capacity of 120 kg, anti-slip rubber treads, and dimensions of 707×621×425 mm.

**Swim spa stairs**  
Dimension with rail: 147×165×93.5 cm  
Dimension without rail: 147×77×88 cm

**Smart-In Step**  
Smart-In Step with heat pump storage compartment. In Peaklife spa models, additional functions are available, such as a USB socket and LED lighting that can be integrated into the Exclusive Lights colour therapy.

**Heat pump**  
You can significantly reduce your spa's heating costs thanks to the latest coolant and high-quality compressor. The reinforced fan reduces the noise level and vibration of the device.

**WIS - Wellis intelligent system**  
The WIS smart water analyser provides a thorough analysis of spa water, measuring quality, temperature, and conductivity. Compatible with all spa types, the mobilephone app enables real-time monitoring of water conditions for immediate updates.

**Automatic water hardness or PH value meter**  
With this equipment, you can constantly check the water hardness and PH level of your spa-water and ensure the correct chemical composition.

**Spa booster pillow**  
This comfortable pillow fits any spa; it can be fixed and adjusted to the water level. Sturdy, heat resistant material, easy to fill, standard pipe fitting, suction cup for non-slip feature.

**Floating chemical dispenser**  
It ensures a steady flow of chemicals. The chemical in the dispenser does not come into contact with the hot tub shell, therefore there is no damage or discoloration. Multi-stage, adjustable chemical dispensing.

**Filter cleaning device**  
The purpose of the Wellis filter cleaning device is to clean your spa filter in a flash.

**Spa wand**  
With the hand-held Spa wand vacuum spa cleaner, you may collect impurities from the bottom of the spa, the steps or the surface of water – without having to drain the water. It is delivered with special heads.

**Manual filter cartridge cleaner**  
The filters can be cleaned simply and quickly with the manual filter cartridge cleaner. Eight lamellas can be cleaned at the same time without splashing; it can be connected to the garden hose.

**Spa-cleaning glove**  
This glove uses microfibre technology to lift dust and dirt from surfaces with a soft touch, preventing scratches and tarnishing.

**Spa cover wipes**  
Spa cover cleaning wipes are designed to clean your spa or hot tub cover removing dirt and stains without the need of additional cleaning agents.

**Spa cleaning disc**  
Eliminates water-surface oils & reduces scum line formation. Absorbs scum, oily residue including body oils, suntan lotion. Improves filter performance.

**Easy cover lifter**  
With the use of the Easy cover lifter, one person can easily remove the thermo cover. It fits all spa sizes. Durable, powder-spayed surface. Non-slip handle.

**Universal cover lifter**  
Removing the cover is easier than ever with the universal cover lifter. In order to ensure proper operation, there must be a space of at least 60 cm between the side of the spa and the wall. Can be used with Xtreme™ thermo cover as well!

**Wellis Crystal spa chemical package**  
Package content:  
2 l Wellis Watertreatment; 18 × chlorine tablets; 1 dispenser (for chlorine tablets); 1 microfibre cloth.

**Wellis Crystal swim spa chemical package**  
Package content:  
26 × water soluble packs (100 g), 1 chlorine tablet holder, 30 × chlorine tablets 90%/20g, 1 microfibre cloth, instructions for use.

**Wellis Crystal Spa Cleaner**  
Specially designed for the cleaning of spa water pipes. Removes lime scale deposits and impurities. It is used when the spa water is freshened or exchanged. As a manufacturer, we recommend spa water be changed quarterly.

**Wellis Crystal Bright & Clear**  
Wellis Crystal Bright & Clear flocculant liquid neutralizes dirt, soap, oil in all spas. When added regularly, ensures crystal clear water.

**Wellis Crystal Alkalinity balancer**  
Increases total alkalinity and prevents fluctuating pH values. Alkalinity is important to be able to check the pH value.

**Wellis Crystal Foam Down**  
Antifoam product for hot water massage pools. Does not contain oily substances. Add undiluted directly to the foam.

**Wellis Crystal Metal clear**  
A de-metallizer neutralizes iron, copper and other minerals in the water and prevents them from accumulating on the surface of the spa, causing damage.

**Wellis Crystal pH Down**  
The pH value of the spa water is very important. If the pH value of the water is well adjusted, water disinfectants also work more effectively. Wellis Crystal pH Down pH reducer lowers the pH level in your spa.

**Active charcoal filter for spas**  
When your spa is filled through an active charcoal pre-filter, you get crystal clear bathwater. Sufficient for pre-filtering 8,000 l water.

**Water softener for spas**  
If your spa is filled with demineralized water using this resin-filled pre-filter, it will prevent lime-stone buildup on mechanical devices, thus increasing their service life.

**Wellis Crystal filter cleaner**  
To keep the spa water crystal clear, the spa filter must be cleaned once a week usage, the Wellis Crystal filter cleaner. Depending on use, this process may need to be performed more frequently as well.

**Bromine salt**  
Water sanitizer granules with sodium bromide content designed for spas equipped with the inClear (bromide generating) system. Each box contains 2.2 kg of product.

**Wellis Crystal Pool check 5in1**  
A set of test strips used to measure total water hardness, total chlorine, free chlorine, total alkalinity, and pH levels in spas. Each box contains 50 test strips.

**Antibacterial filter cartridges**  
Paper filters with an antibacterial coating, whose fibers with an increased surface area are capable of multiplying the performance of a traditional filter cartridges.

**Aroma liquid for spas**  
Liquid aroma for spas 250 ml. ucalyptus, lavender, mediterranean, orange bloom, rosemary.

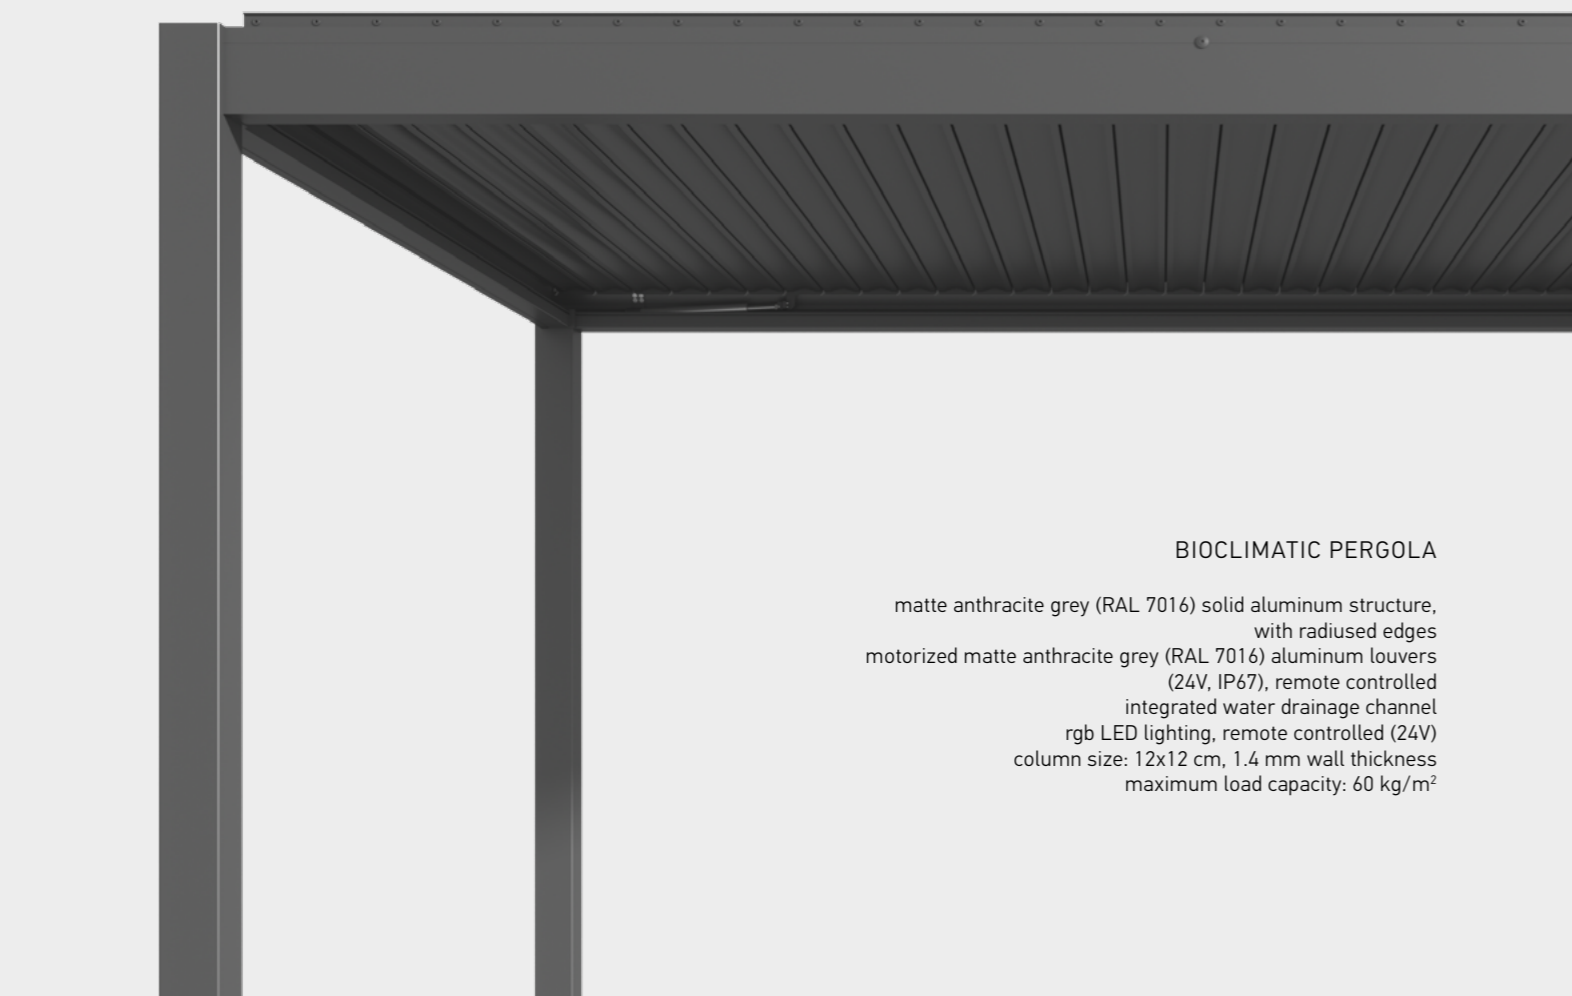

**Rollcover**  
Explore our newest product addition, the swim spa roll covers that is crafted to enhance your spa experience on select models: Olympus, Danube, Amazonas, Rio Grande.  
**Key Features:**  
– Durable and lockable, designed to withstand any weather condition.  
– UV protected for longevity and appearance maintenance.  
– Easily roll off in under 60 seconds, simplifying your spa experience.  
– Compatible with optional shelf brackets for added functionality.

**Thermal cover**  
The purpose of using the thermo cover is to maintain the set temperature of the spa water. Thermal insulation is achieved through a special foam layer, which is covered with a UV-resistant artificial leather cover on the outside. The thermo cover is 12 cm thick in the middle and slopes towards the edges of the spa (7 cm), allowing rainwater to easily drain off.

# MotionFlex Bioclimatic Pergola

The elegantly and modernly designed MotionFlex louvered pergolas provide an exclusive appearance and excellent shading for your home's outdoor areas.

The motorized control placed on the roof structure allows for easy adjustment of the position of the aluminum louvers to reflect harsh sun rays, permit diffused sunlight, provide complete protection against rain and snow, or even ensure uninterrupted ventilation preventing the air beneath the pergola from warming. Thanks to the bioclimatic pergola, we can relish the outdoors in every season. Regardless of weather changes, we can enjoy the outdoor spaces while using the hot tub or even while relaxing on stylish garden furniture. The pergolas are equipped with rgb LED lighting, serving as evening mood lighting, thus ensuring a comfortable outdoor experience even during the evening hours.

Closed louvers

Semi-open louvers at 45°

Open louvers at 90°
